All over the world 140.000 children died of tuberculosis.

Federal Tuberculosis Monitoring Center. F.№8. 2016

Federal Tuberculosis Monitoring Center. F.№8. 2016

Main problems and difficulties in the area of tuberculosis controlling in child and adolescents populations are:

- the excess incidence in the focus of tuberculosis,
- the excess incidence of the children with MDR tuberculosis,
- the parents refusal to carry out preventive examinations of children for tuberculosis,
- the growth of children with HIV infection.
